DETAILED ACTION

Claims 13-24 are pending. The Amendment filed 5/6/04, amended claim 13.

112 Rejection Maintained

The rejection of claims 13-24 under 35 U.S.C. 112, 1st paragraph, is MAINTAINED for the reasons set forth in the Office Action mailed 11/6/03, and those found below.

Applicant argues, "one of ordinary skill in the art would, after reviewing the present application, be able to practice the claimed invention, without undue experimentation". This argument is not persuasive. First, while Applicant has made this statement, Applicant has provided no evidence or scientific reasoning to substantiate this statement. Second, for the reasons stated in the previous Office Action, the instant specification is not enabled for a composition that does not require the presence of antibiotic, bacterial or fungicidal agents.

102 Rejection Maintained

The rejection of claims 13-24 under 35 U.S.C. 102(b) as being anticipated by Mougin et al. (5,851,517) is MAINTAINED for the reasons set forth in the Office Action mailed 11/6/03, and those found below.

Applicant argues, "The Applicants submit however that isopropyl palmitate and similar compounds are used in the cited document as part of a non-aqueous medium to protect the composition containing a dispersion of surface stabilized polymeric particles. The isopropyl palmitate is not described in the cited patent as being the active ingredient which provides the desired technical effect of the cited patent. . . The purpose of the cited patent is not to describe the use of a composition of a fatty substance free of carbohydrate units as recited in the presently claimed invention". This argument is not persuasive. It is respectfully pointed out that a compound and its properties are inseparable. Thus, whether isopropyl palmitate is referred to as

Art Unit: 1617

the active ingredient, or whether the purpose is the same, is irrelevant. The cited art teaches the same methods of applying to the skin a composition comprising the same active ingredient in the same effective amount. Thus, the instant method is anticipated by the cited art.

The rejection of claims 13-24 under 35 U.S.C. 102(e) as being anticipated by Santor et al. (6,524,594) is MAINTAINED for the reasons set forth in the Office Action mailed 11/6/03, and those found below.

Applicant argues, "the presently claimed method of reducing the adhesion of microorganisms to the surface of the skin and/or the mucous membranes is not specifically or inherently taught by the cited patent". This argument is not persuasive. In the previous Office Action, it is specifically laid out how the cited art anticipates the instant claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
